

have helped if they wanted. Where there is a will there is a way.

Om wanted the things to happen in a different way. My inquiry and request reached the kind hands of Mr. Mike Buckheit, the Director of the Field Institute of Grand Canyon. He showered a series of marvelous photos on us. We wanted one. We got many. It was a grand blessing from OM: One God Universal. We are highly obliged to him for his interest and generosity. It is truly invigorating to correspond with him. Now we are sharing this rich treasure with OM devotees all over the world. We are happy OM has given us this opportunity to share these Marvels of Nature with our friends of OMGOD group.

We see here in this show, created by means of ProShowGold, some mighty peaks named as temples of Brahma, Vishnu and Shiva as well as the shrines of Rama and Krishna. There is one Inversion—peaks above, clouds below!

There is also a formation named as Vishnu Schist. It is the earliest foundational formation, a kind of base. This is really a remarkable phenomenon to realize.

Now Bhagavan Vishnu is not only the preserver of the world, but he as Na/-ra/-yan/a is the creator of the creator as well! Brahma comes out of the naval of Vishnu. He is one of the Trimurti as well as the Supreme Lord.

Hindu mythology tells us that Bhagavan Vishnu incarnated Himself as the Tortoise—Ku/-rma/-vata/-ra to serve and function as the foundation—the fundamental base—to support the Serpent God (Shesha Naga) to bear and hold the earth. In other words, the earth rests on the Shesha Naga, who rests on the Tortoise—Vishnu Bhagavan.

Before we close this short presentation, we would like to tell our readers that there is also a natural formation named as Hindu Amphitheater.

The Rama Shrine in Arizona's Grand Canyon
